Sunday Line Move Cheat Sheet

Read the move before you bet the move

STEAM

A fast, same-direction line change across several sportsbooks in a short window, usually from large or respected bets. Example: −2.5 to −3.5 at several books within minutes.

REVERSE LINE MOVEMENT (RLM)

The line moves against the side getting most public bets. Most tickets on the favorite, but −7 drops to −6: books may be reacting to money on the underdog. Ticket and money splits are estimates.

BEFORE YOU BET ANY MOVE

1. **From where?** Compare to the game-week opener (Tuesday line), not last night's number.
2. **Through a key number?** 3 7 are the most common NFL final margins, then 10, 6, 4 and 14. 2.5 to 3.5 matters far more than 4.5 to 5.5.
3. **Is there news?** Injuries, a QB change and wind explain most moves that look like steam.
4. **Did the price move?** −3 −110 to −3 −125 is a move even if the spread didn't change.
5. **Is the number still there?** If the best price is gone, set a target and wait.

BREAK-EVEN WIN RATE

Odds	Must win	Odds	Must win
−150	60.0%	EVEN	50.0%
−120	54.5%	+120	45.5%
−110	52.4%	+150	40.0%

Standard −110 / −110 hold is **4.55%**. Shop the line: half a point or 10 cents adds up.

TEASERS (6 POINTS)

Teaser	Price	Each leg needs
2-team	−110	72.4%
2-team	−120	73.9%
3-team	+160	72.7%

Only tease through **both 3 and 7**: favorites −7.5 to −8.5 down to −1.5 to −2.5, underdogs +1.5 to +2.5 up to +7.5 to +8.5.

PICK'EM: EACH PICK MUST HIT

Power slip	2 (3x)	3 (6x)	4 (10x)	5 (20x)	6 (37.5x)
Break-even	57.7%	55.0%	56.2%	54.9%	54.7%

Per pick = (1 ÷ multiplier)^(1 ÷ picks). Multipliers vary by app and change; check yours. Not available in all states.

WHEN NOT TO BET A MOVE

- The move is all news and the new number is fair.
- You'd get the worst number of the week.
- It moved off a key number (3.5 to 2.5) and you'd lay the bad side.
- You'd bet more than your normal unit to "catch up."

YOUR SUNDAY ROUTINE (10 MINUTES)

1. **Tuesday:** the game-week opener posts. That's the line every move is measured from.
2. **Sunday morning:** read the Linewire email: the week's biggest moves from the opener, before kickoff.
3. **Pick a game:** run it through the free line movement checker (open vs current, plus what the move means).
4. **Decide on price:** set the number you'd bet at. If the market already took it, pass or wait.
5. **Teasing?** Check every leg crosses 3 and 7 and that each leg clears the break-even above.
6. **Size it:** same unit every bet. No chasing, no "make it back" parlays.
